

CUSTOM INTEGRATED SYSTEMS

Closing the Gap in Technology

our company

As home integration evolves, when it comes to offering a range of specialized products and services, Custom Integrated Systems continues to reside on the cutting edge of technology. Whether it is residential or commercial automation, CIS focuses on the primary goal of every project, which is "Integration": CIS' ability to take all collective parts of the installation and harmonize them to work together in one well designed system.

CIS provides the following services without any out-sourcing:

- Audio/Visual Systems
- Touch Screen Technology
- Design/Lighting Systems
- Motorized shade systems
- Telecommunication/Data networking
- CCTV/Security
- Control Systems
- Electrical

CIS understands that not every client is the same. This is why CIS offers their clients not only the highest quality of products and services but also, unsurpassed personalized attention, since every job is custom in nature.

With over 15 years of experience as industry specialists and their overall enthusiasm and professionalism, CIS can design, install and service any integration job. By being innovative and multi-faceted in its industry, CIS continues its on-going pursuit of "closing the gap in technology".

Home and Business Automation

A Simpler Future:

Aesthetics and Practical Use

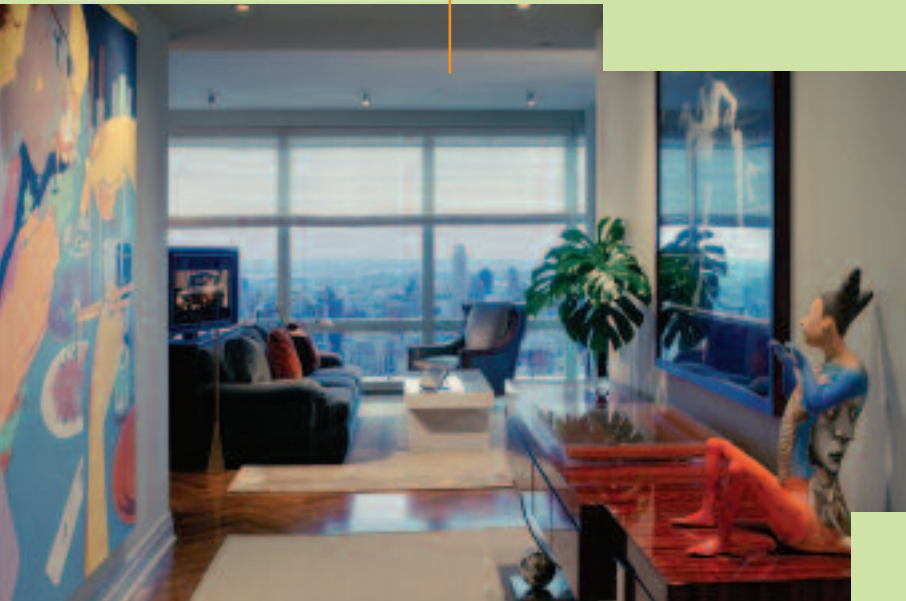

Some people are concerned that automating their home or office is just too complicated, when in fact, the opposite is true; it's life that's complicated and demanding. CIS can channel that complexity into one integrated system that simplifies your life with beauty, safety and ease

Imagine a home or business wired to be in touch with your daily routines, travel plans and lifestyle – an “environmentally smart” system programmed to be reliable and flexible

Using the latest technology in conjunction with “user friendly” control devices such as touch screens and keypads, Custom Integrated Systems can design a centralized operating system for your home or business

From lighting your study to operating the shades in your children's bedroom, cuing up a film in your home theater or adjusting the temperature setting in your home, CIS can integrate those applications in one seamless system

home automation

audio visual

Audio/Video/Home Entertainment **Sight and Sound & Security**

We live in a visual, technical culture. This has created new and interesting uses for our home and office environments

Custom Integrated Systems can design and install inclusive systems using the latest in single-touch control, surround sound technology & video displays

CIS integrates your lighting, shading, sound, projection, entertainment systems & CCTV to provide a refined level of comfort at home

Illumination

State of the Art in Lighting

Years ago, Lutron revolutionized lighting with the first dimmer control. They've gone on to perfect one of the most powerful and flexible lighting control systems in the world

Known for its beauty, elegance and function, Lutron's control systems have the ability to integrate shading, audio/visual, security and other functions in the home or office

When you're looking for a lighting plan to enhance the dramatic beauty of your home, outdoor space and treasured objects, CIS provides instruction, tech support and unparalleled service

Shading

Tapping the Beauty of Natural Light

Lutron pioneered the idea of balancing natural and electrical light with an automated system that complements the inside and outside environment

CIS can design a Lutron system that will enhance every room in your home or office, at every hour of the day, with the touch of a button

With a smart lighting/shading design, you have the power to retain your natural views while protecting your most valued possessions from the damaging rays of the sun.

Winner of Lutron's Largest Shade Project Excellence Award CIS offers a wide variety of styles and opacities, from view retention to total blackout, with a one-touch, silent operating system

shading

data networking

Tele-Communication/Data Networking

Touching the World with Intuition

Today, communication is everything

As the word On-Line becomes increasingly more relevant to the way we communicate, bank, shop, invest, travel, research and explore our options, we count on high speed internet access, satellite and wireless communication to touch the world

CIS takes nothing for granted in designing simple, multi-line phone systems and networking options for your office or home

A smart audio/video system offers greater security than ever before. Closed circuit television extends your vision to any part of your home or office – indoors or out, with the touch of your finger. With remote capabilities, this is possible wherever you are

CIS is a leader in integrating telecommunication/networking technology. Supplying, installing and programming the fastest and most well designed systems on the market, CIS integrates them effortlessly into the daily routines of your home and business
